FHIRBall Website — Content Author Guide

Reference for editors who create and manage content through the FHIRBall CMS.

Table of Contents

1. Accessing the CMS
2. Managing Articles
3. Managing Events
4. Editorial Workflow
5. Media / Image Uploads
6. What Requires a Developer

---

1. Accessing the CMS

- **URL:** `https://fhirball.org/admin`
- **Login:** Email + password (set when you accepted your invitation)

If you've forgotten your password, click **Forgot password?** on the login screen. No admin action is needed.

After login you'll land on the CMS dashboard with two collections: **Articles** and **Events**.

---

2. Managing Articles

Articles appear on the `/resources` page of the site.

Creating an article

1. Click **Articles → New Article**.

2. Fill in the fields:

Field	Notes
Title	Required. Shown as the page heading and in the resources list.
Description	Required. Appears as the card summary on `/resources`.

Field	Notes
Publish Date	Required. Pick a date using the date picker (format: YYYY-MM-DD).
Author	Optional. Defaults to "FHIRBall Alliance".
Featured Image	Optional. Upload via the media library (see §5).
Tags	Optional. Comma-separated list (e.g. `FHIR, Interoperability`).
Body	Required. WYSIWYG rich-text editor.

3. Click **Save** to save as a Draft.

4. When ready, promote through the editorial workflow (see §4).

Editing an existing article

1. Click **Articles** in the left sidebar.
2. Click the article title.
3. Make changes and click **Save**.

Deleting an article

1. Open the article in the CMS.
2. Click the **Delete unpublished changes** button (for drafts) or the trash icon (for published articles).

> Deleting a published article removes it from the site after the next deploy (~1–2 minutes).

---

3. Managing Events

Events appear on the `/events` page, sorted by start date (ascending).

Creating an event

1. Click **Events → New Event**.

2. Fill in the fields:

Field	Notes
Title	Required. Name of the event (e.g. "HIMSS 2026").
Image	Optional. Event logo or banner.
Location	Optional. City, state or "Virtual".

Field	Notes
Start Date	Required. Date picker (YYYY-MM-DD).
End Date	Optional. Leave blank for single-day events.
Time	Optional. Free-text (e.g. "9:00 AM – 5:00 PM ET").
Description	Required. Short plain-text summary (2–4 sentences).
External URL	Required. Link to the event's official website.
Body	Optional. Additional rich-text content (agenda, speakers, etc.).

3. Save and promote through the editorial workflow (see §4).

Past events

Past events remain visible on the `/events` page — there is no automatic archiving. To remove a past event, delete it the same way as an article (see §2).

---

4. Editorial Workflow

Content goes through three stages before it appears on the live site.

```
Draft  →  In Review  →  Ready  →  Published (live)
```

Stage	What happens
Draft	Saved privately. Not visible on the live site.
In Review	Submitted for review. A pull request is opened automatically.
Ready	Approved and queued to publish.
Published	Merged and live. Netlify deploys in ~1–2 minutes.

Promoting content through the workflow

In the **Workflow** tab (top navigation), drag a card between columns — or open the content item and change the **Status** dropdown at the top.

Publishing from "Ready"

Once a card is in the **Ready** column, open the content item and click the **Publish** button. The page will be live within a couple of minutes.

---

5. Media / Image Uploads

All uploaded images are stored in the site repository and served via Netlify CDN.

Uploading an image

1. In any image field, click **Choose an image**.
2. Click **Upload** to add a new file, or click an existing image to reuse it.
3. Supported formats: JPG, PNG, SVG, WebP, GIF.

Image guidelines

- **Articles:** Use a 16:9 image for the featured image (1200×675 px recommended).
- **Events:** Event logos display without cropping. Provide the logo at its native aspect ratio.
- **File naming:** Use lowercase, hyphenated names (e.g. `himss-2026-logo.png`). Avoid spaces.
- **File size:** Keep images under 500 KB. Compress before uploading if needed.

---

6. What Requires a Developer

The following are outside the scope of the CMS. Contact the development team for these:

- Adding or editing **member profiles**
- Changing site **layout, navigation, or design**
- Adding a new **page**
- Adding new **CMS fields or collections**
